

VILLAGE OF MILL NECK
WEST SHORE ROAD UPDATE
Phase III
November 3, 2017

Dear Mill Neck Residents,

The Third and final phase of the West Shore Road project is complete. We would like to thank G&M Earth Moving Inc. for doing a terrific job.

It has taken almost five years to complete, beginning shortly after Super Storm Sandy. This project which will certainly last our lifetimes and beyond and we now have a beautiful view of Oyster Bay and a path to let us enjoy it.

We would like to thank all of our residents who were inconvenienced by the construction and detours through the many months and years. This was a Nassau County project and we would be remiss not to mention recently retired Donna Boyle, the County Engineer on virtually the entire job. We would also like to thank County Legislator Donald MacKenzie along with his staff who were always available for our calls concerning the project and our residents concerns. We would finally like to thank Donna Harris, Mill Neck Village Clerk/Treasurer who answered the many calls on the project and sent out the weekly updates during the various phases of the project.

Enjoy our new complete roadway and drive safely.

Sincerely,

Mayor Peter Quick and
The Trustees of the Village of Mill Neck
